

Bill: Heres that ad you wanted

Now there's a Mouse that flies.

I don't know if there still is business though
heads

Get Acquainted in 15 Minutes

A few minutes of experience will put you in command of the VCS. Before long, moving the cursor will feel like a natural extension

Faster than a Speeding Mouse

Since you can look much faster than you can reach and roll, the VCS is faster than a mouse. And because your hands stay on the keyboard you maintain continuity and concentration. Expect a real boost in productivity.

of vision. You'll simply look and click. The VCS headset accommodates eyeglasses and won't muss up your hair. And since it doesn't rest on your ears, you're free to use the phone. The VCS works with any 128K or 512K Mac. No hardware or software modifications are required.

Introducing the View Control System.™ Ultrasonic technology that moves your cursor at the speed of sight.

Your relationship with your Mac is about to change. Dramatically. Because now the View Control System™ (or VCS) from Personics gives you a powerful new way to control the cursor. Fast. Direct. Intuitive. It's the best thing since the Mouse. In fact, it's better.

Reclaim Your Desktop

The VCS flies above the ordinary mouse, leaving more space on your desktop. Now you have room for books, papers and your favorite coffee cup. If you want, connect both your mouse and your VCS to the Mac and use them interchangeably.

Just \$199.00
and Easy to Order

The VCS is available right now, directly from Personics. Call us toll free. A member of our sales staff will be happy to answer your questions. If you're ready to order, please have your major credit card at hand when you call. When your VCS arrives, try it for 30 days. If you're not completely satisfied, return it and we will swiftly refund your money. And we back the VCS with a full one year warranty. Satisfaction guaranteed.

Move the Cursor Where You Look On the Screen

A lightweight headset translates natural head movement into cursor movement. Look to the right and the cursor moves right. Look down and left and the cursor moves accordingly. No exaggerated head motion is required, just subtle, natural rotation.

State-of-the-art Technology

The VCS uses a proprietary ultrasonic technology to measure subtle changes in the rotation and angle of your head.* These changes are then translated into electrical signals just like those produced by the Mouse. The amount of cursor motion produced by a given amount of head motion depends on the rate

your head moves. By monitoring this rate, the VCS can tell whether you are scanning across the screen or zeroing in on a small target. Then, it automatically adjusts to give you the right amount of head-to-cursor translation. Zip from corner to corner, or point to a tiny target with ease, even an individual pixel!

*Patent Pending.
IBM PC and Apple II versions available soon.

Look Ma, Both Hands!

Now you don't have to take your hand off the keyboard to reach for the Mouse. A unique button pad clips on your keyboard just below the space bar. One button activates the headset. Use the second button for clicking and dragging. No more reach, grab, roll, click, return.

The VCS. A simple and direct link between man and computer. Try it, and watch your ideas take off.
