

**Thank you for your interest in Footmouse™**, the new tool to make your work easier, faster and more fun. Footmouse allows you to operate the cursor with foot motion instead of keyboard action. Now you can concentrate on what's on the screen, not the keyboard, and increase your creativity.

**Using Footmouse is easy.** The cursor is moved by a slight east/west/north/south sliding motion of the top plate of the Footmouse. The base of the pedal remains stationary on the floor. The Footmouse is like your cursor control keys, it moves one space and auto repeats if held. There are no buttons because your hands are on the necessary keys. And remember, the Footmouse doesn't change normal keyboard operation in any way. We haven't eliminated anything, we've simply enhanced what you have.

**Footmouse enters data with just one click of the foot** in its use with most popular programs, such as **Lotus 1-2-3/Symphony®** and **Ashton-Tate's Framework®**. Footmouse allows you to input numbers with the 10-key pad and enter that data with your foot, no more confusing operations with the num-lock key. This makes data entry twice as fast, accurate and easy regardless of prior computer experience.

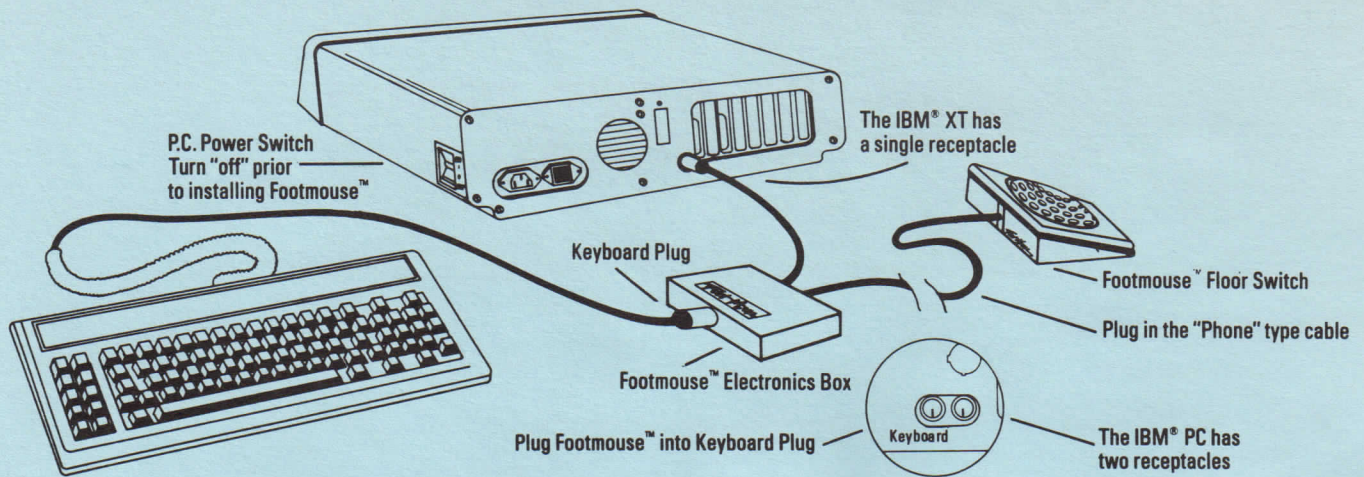

**Word processing is simple to do and easier to learn** as are other programs written to accept keyboard cursor commands. Footmouse works with standard keyboard controlled software. Footmouse sits under your desk, out of the way, so it doesn't clutter your valuable desk space.

**The Footmouse is simple to plug in.** There are no boards or software to install, or confusing manuals to master. Plugging in the unit takes less than a minute. Using the footmouse quickly becomes second nature, like the gas pedal in your car.

**The Footmouse is a quality tool**, not a toy. Versatron manufactures the Footmouse with durable aerospace materials, 100% tested to high quality standards.

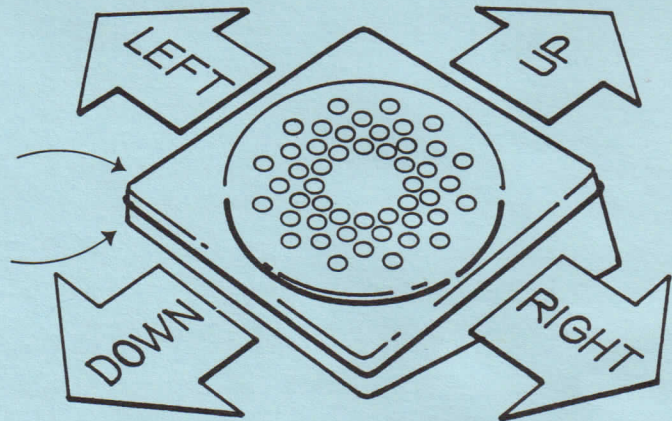

**Who uses the Footmouse?** Accountants, engineers, businesspeople, anyone who does numeric entry or word editing and wants their job to be easier. People in both large and small businesses benefit with Footmouse. Currently, Footmouse is being used by such major corporations as **Xerox, Kodak, Citicorp, American Express** and **IBM** to name just a few.

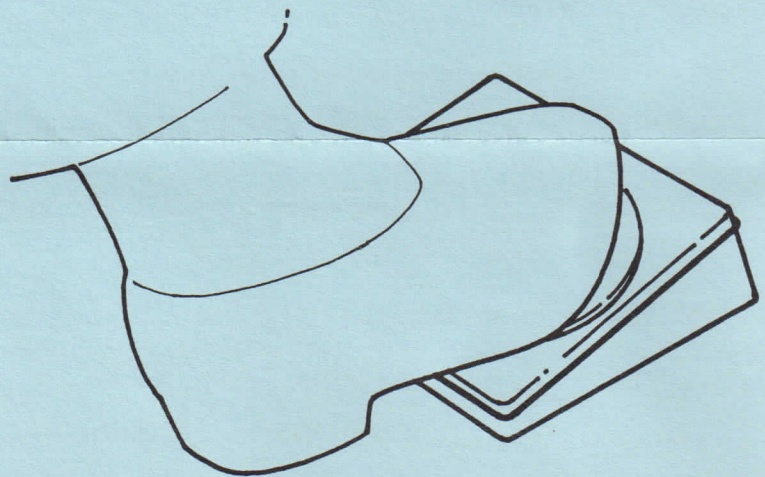

## PLUGGING IN THE FOOTMOUSE™ IS SIMPLE

TOP SLIDES VERY SLIGHTLY IN THE 4  
CURSOR DIRECTIONS.  
BASE DOESN'T MOVE ON THE FLOOR.

HOLDING THE PEDAL IN ANY OF THE 4  
DIRECTIONS CAUSES "AUTO REPEAT"  
CURSOR MOTION

CENTER THE BALL OF YOUR FOOT ON THE  
RUBBER PAD, AND SLIDE THE TOP UP OR  
DOWN OR SIDWAYS.  
THE TOP OF THE FOOTMOUSE SLIDES ON  
THE BASE. THEREFORE, YOU DO NOT  
HAVE TO PUSH DOWN HARD.

USING THE FOOTMOUSE™ PEDAL IS EASY

The **Footmouse™** is available for **IBM PC, IBM XT, Compaq DeskPro** and **ITT Xtra** for only **\$225. TO ORDER YOURS - call us today at (800) 443-1550** or California **(800) 435-1550** with your **Master Charge/VISA** number, or fill out and mail in the enclosed order form immediately. Footmouse is available for same day shipment.
