

**SET A NEW
WORLD'S SPEED RECORD.**

Footmouse™ was designed by the high performance engineers at Versatron. Since 1979, Versatron has held the World's Speed Record for Human Powered Vehicles. Footmouse™ was designed to accelerate productivity. And maybe set some new world speed records. In the office.

**SOMETIMES
THE
SIMPLEST
TOOL
CAN BE
THE
MOST
POWERFUL.™**

Foot Mouse™

Foot Mouse™

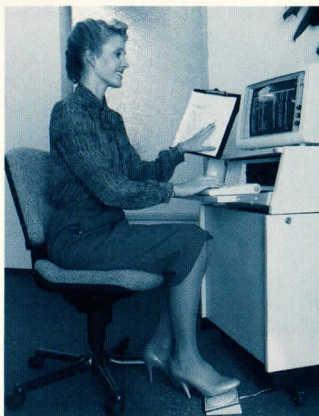

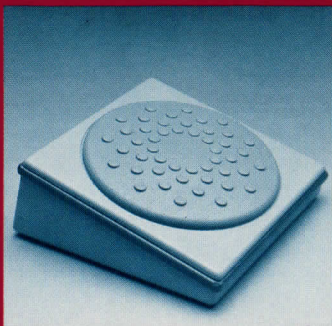

Foot Mouse™

**INTRODUCING THE PRODUCTIVITY
BREAKTHROUGH THAT MAKES SENSE.
FOOTMOUSE.™**

The power to produce results is the key to success in business. Introducing Footmouse.™ Footmouse™ is a reliable and accurate device that increases computer learning and efficiency. Footmouse™ produces the kind of results that translate into better time management and higher profits. It helps run software programs with greater ease, speed and flexibility. Footmouse™ is a new productivity tool for the office.

THE PRODUCTIVITY MACHINE.

Workflow is accelerated. It's like having three hands. A simple, elegant, yet powerful tool. Tests show Footmouse™ increases computer productivity by as much as two to three times. It improves the efficiency of word processing and spreadsheet. Footmouse™ is the first foot-controlled cursor.

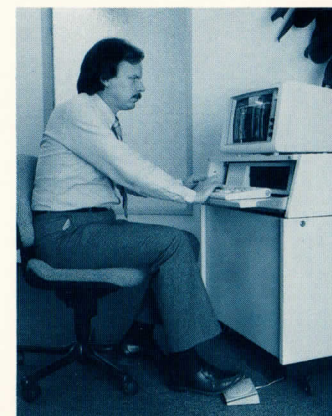

**USER-FRIENDLY RE-DEFINED:
IF YOU CAN TAP YOUR FOOT...**

Easy to install. Easy to use. Footmouse™ requires no confusing thick manuals to read or boards, fancy software or commands to install. No buttons to press. Footmouse™ takes five seconds to install. It's up and running almost immediately. If you can tap your foot you can use Footmouse.™ It's as easy as that.

**PUT THE MOUSE ON THE
FLOOR. WHERE IT BELONGS.**

Footmouse™, unlike hand-mice, doesn't interrupt workflow. Slowing down productivity. Footmouse™ frees the hands for more important work. Like entering data. And frees the mind for more important work. Like thinking. Footmouse.™ In a class by itself.

**ELIMINATES
"NUM-LOCK MADNESS"**

Footmouse™ always lets you know what mode you're in. Especially when using the IBM® keyboard. No confusion when switching between cursor and numeric keys. No "num-lock madness" leading to frustration or costly errors. Footmouse™ is an intelligent system.

**YOU NAME IT.
FOOTMOUSE™ RUNS IT.**

Footmouse™ is compatible with most software for the IBM® PC. Other models will be available soon for the IBM® AT, IBM® XT, Compaq® Desk Pro, Apple® Macintosh, Apple® Ile, Ivy® and select RS-232 terminals (Tele-video®, Sperry®, Wang®, DEC®, WYSE®).
