Feel the Force™ with WingMan!

Get ready to Feel the Force™ in Windows® games and Web sites! The Logitech® WingMan® Force Feedback Mouse adds a tactile dimension to mousing that puts you closer to the action and makes it all seem just a little more real. Feel the texture of surfaces, the contours of shapes, the boom, vroom, ka-pow of intense game action. Play faster through touch-only cues. Add dash to common desktop activities. Ride waves of sensation as you surf force feedback multimedia Web sites.

- WingMan® Force Feedback Mouse supports force feedback written into mouse- and joystick-controlled games.
- It provides force feedback in Windows® and on the Web through the FEELit Desktop.
- Its mode settings allow you to configure the device as a mouse or a joystick. Use joystick emulation for joystick-controlled force feedback games and mouse support for mouse-controlled games and standard desktop activities.
- It includes a full version of Immersion FEELit Studio for power users to develop force feedback effects for their Web sites and to edit force feedback effects in many games.
- Its three-button design means versatile performance. Its USB interface makes it easy to connect and use.
