That's right-we've just cut prices on our MARK II™ Mouse, but we didn't cut corners to do it.

Save up to \$50 on every MARK II Mouse ordered after July 1, 1984.

Your computer system deserves top quality peripherals, and your customers demand them. So we still make the MARK II Mouse just as tough and reliable as ever. We still guarantee it fully for one year of normal mouse use. And we still run each and every mouse through a rigorous battery of tests and inspections before we send it along to you. The only difference is in the cost—and that's the bottom line!

Call Jane Robinson at the Mouse House today to find out how much you can save on your next order. Or fill out and mail the attached card and we will respond promptly with detailed product literature and pricing information.

Purveyors of fine digital mice to an exclusive clientele since 1975.

The MARK II
mechanical mouse moves
the cursor on your computer
screen in direct proportion to its
own motion; it does not need a special
substrate. Its precision and high resolution make it ideal for graphics, image
selection, text editing and many other
applications.
