Radio Mouse

THE WORLD'S MOUSE EXPERTS HAVE CREATED A DIFFERENT KIND OF ANIMAL.

Introducing new MouseMan™, the high-resolution ergonomic mouse for IBM and Macintosh, from Logitech. New MouseMan is more comfortable to use than other mice because it's scientifically designed to fit the human hand. It also requires less wrist movement. In fact, MouseMan works so effortlessly, so intuitively, it feels like an extension of its user.

Tools That Power The Desktop.

New MouseMan for the Right Hand

➤ Its sculpted, ergonomic shape comfortably fits your right hand. And its ingenious, three-button design can save you thousands of keystrokes. New MouseMan also gives you the highest possible resolution—400 d.p.i. So you can control the cursor effortlessly, with minimal wrist movement. Of course, new MouseMan is totally plug compatible with Microsoft®. So you can make the switch today.

New MouseMan for the Left Hand

➤ If you're tired of conforming to a right-handed world, take things into your own hands. Now lefties can feel all of MouseMan's amazing comforts too. The clever, ergonomic shape. The work-saving three-button design with 400 d.p.i. resolution, plus Microsoft compatibility. Isn't it time you came to grips with a mouse that actually fits your hand?

New MouseMan Cordless Radio Mouse

➤ It's a totally different breed of mouse. New MouseMan Cordless avoids the annoying interference problems that plague infrared cordless mice. Other objects on your desktop won't obstruct its radio signal. So you can roam your desktop with total freedom. And MouseMan Cordless "sleeps" when you're not working—a common battery can last up to a year.

All MouseMan products come with Logitech's legendary quality and lifetime warranty. For more information call (800) 231-7717 or (800) 552-8885 in CA.
