

PoqetPad

The 1.2 lb DOS - Compatible Pen System for Field Automation.

The importance of timely & accurate data

In today's increasingly competitive marketplace, accurate information is the key to delivering quality products and services in a timely manner. Nearly every organization invests heavily in host computer systems and networks for mission critical data. *But without timely and accurate data collection, these systems are virtually useless.*

Traditional methods of data collection fall short

Every day, millions of workers collect and store information. Most rely on antiquated paper forms. A few struggle with the limited functionality of traditional hand-held computers.

While paper forms are easy to use, getting them into computerized form requires entering their information twice. This takes time, money, and increases the risk of errors. Traditional hand-held computers improve accuracy and speed, but are difficult to use and require extensive training.

PoqetPad™ is the solution. It is a full function, PC-compatible, hand-held computer that's as easy to use as a pencil and paper.

PoqetPad™...

Zero defects data collection

Developed by Fujitsu Personal Systems, PoqetPad™ data collection tool is reliable and flexible. Since it operates using a paper and pen metaphor, it's easy to learn, carry, and use. PoqetPad™ is a 1.2 pound, PC-compatible, pen-based computer that runs on standard MS-DOS®. This lets it easily integrate into your present computer system.

Data collection is as simple as filling out a paper form directly into the computer. This reduces errors at the input source. Data is stored in the hand-held computer and can be transmitted to the home office at any time using a modem.

PoqetPad™...

Markets & applications

PoqetPad™ should be in the hands of any information gatherer. Here is a sampling of how PoqetPad™ can be used in a number of markets.

CONSUMER PACKAGED GOODS

PoqetPad™ assists route drivers, merchandising representatives, and field researchers in remote order entry. It also can be used for shelf space tracking, competitive analysis, general consumer research, and merchandising or promotional tracking.

PHARMACEUTICALS

With complicated government regulations and signature capture requirements, Poqet Pad™ gives field representatives the exact

form they need every time. This frees up time that can be used to increase sales.

UTILITIES

Key goals are maximizing customer service while minimizing down-time and capital inventories. Utilities companies can use PoqetPad™ in applications such as field operations, facility inspection, inventory tracking, asset management, maintenance, and general customer service.

TRANSPORTATION

Whether moving goods by road, rail, air, or sea, PoqetPad™ improves your productivity. Let it streamline fleet management, dispatching and shipment routing, and perform inventory control while simplifying maintenance and damage inspection.

HEALTH CARE

Processing patient information is a critical component of improving care and reducing costs, and ensuring proper treatment. PoqetPad™ helps health care professions in diverse areas such as patient care management, facility maintenance, automated billing, and home health care monitoring.

GOVERNMENT

In public service and safety programs, PoqetPad™ streamlines data collection, information retrieval, inspection, compliance verification, environmental material monitoring, and emergency response.

Weighing only 1.2 pounds, the PoqetPad™ is easily carried in one hand for extended periods of time. (Shown with optional bar code reader/stylus.)
