➤ SUGGESTED COPY:

Twice the speed of a standard mouse—in half the space. Turbo Mouse ADB turns mouse technology upside down. It puts the mouse ball on top, rather than on the bottom like a standard mouse. You move only the mouse ball, not the whole mouse. That's why Turbo Mouse ADB is quicker, quieter, and easier to use.

Turbo Mouse ADB is also sensitive to speed. Roll the mouse ball slowly, and Turbo Mouse ADB will move the cursor a certain distance on the screen. Roll it quickly, and the automatic acceleration feature built into the Turbo Mouse ADB will move the cursor further. You can work with pin-point precision or speed the cursor through your document.

Turbo Mouse ADB has two mouse buttons—one for right-handed users and another for lefties. Only 4" x 6", it will fit neatly at the end of your keyboard. Compatible with Macintosh SE, Mac II and Apple IIGS. Comes with Kensington Mouse Pocket ADB.
