

3 Reasons to Use the twiddler™

See review in
March Byte Magazine,
page 51.

- 1. Performance:** The Twiddler has the *mobility* to move to any area on the screen in a single, swift movement of the hand. You have the *control* even to write on the screen in cursive script (a notoriously difficult task for pointing devices!) Plus, the Twiddler provides the pixel-by-pixel *precision* needed for applications like CAD and Desktop Publishing.
- 2. Convenience:** Reach out and take the Twiddler from the side of your monitor where it parks out of the way against a Velcro patch. Lean back in your chair and point, click, and type in a position comfortable for *you*. No mouse pad, desktop, or any surface at all is needed.
- 3. Reliability:** The Twiddler's pointer is based on a sealed sensor, *immune to the dust and dirt* that can shorten the lives of ordinary mice and trackballs. It has a full 3-year warranty.

*P.S. Also, touchtype at 35+ words-per-minute
on the Twiddler's full-function keyboard!*
