

Microsoft K-12  
Education Transformation Framework

# Teaching & Learning

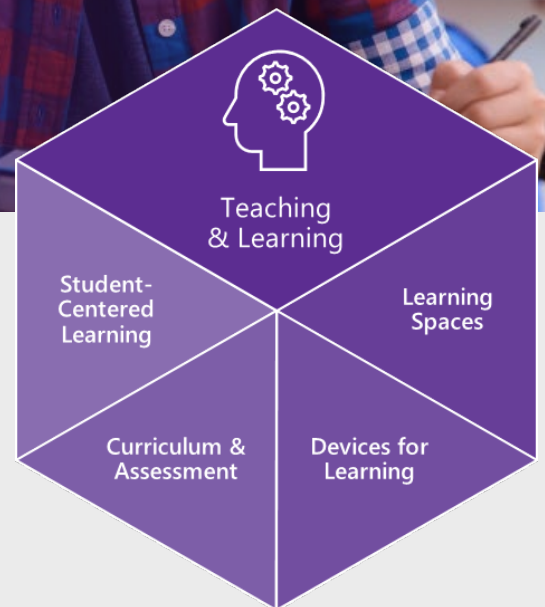

Helping all students achieve their potential by taking a student-centered approach to explore all aspects of teaching and learning: curriculum, assessment, devices, and spaces with a focus on understanding and meeting the needs of all students.

Imagine a classroom where students are excited to come to learn and work with their peers on collaborative and competency-based projects in flexible, collaborative, equitable, healthy, and inspiring learning spaces.

A learning environment where assessment is part of the curriculum and guided by the direct needs of students and connected with their experiences in and out of the classroom working with real-world tools that will solve tomorrow's problems.

**Transform the way students learn with the latest in Teaching & Learning.**

The Microsoft Education Transformation Framework is a guide for education leaders to navigate the complexity of transformation impacting every aspect of their mission. It facilitates the process of envisioning what's possible and developing a strategy to achieve it.

# What are the outcomes of transformation?

**Engaged students learning without instruction.**

**Real-time learning with assessment part of the curriculum.**

**Students prepared for life beyond school years.**

**Flexible spaces for collaborative and inspiring learning.**

## Great Examples

See examples of Teaching & Learning transformation from those that have done it around the world.

[CASE STUDIES](#)

## Learn More

This course focuses on Teaching & Learning aimed at school leaders looking to drive change in their schools.
