

Microsoft® Research

Kinect™ for Windows® SDK beta

# Programming with the Kinect for Windows SDK

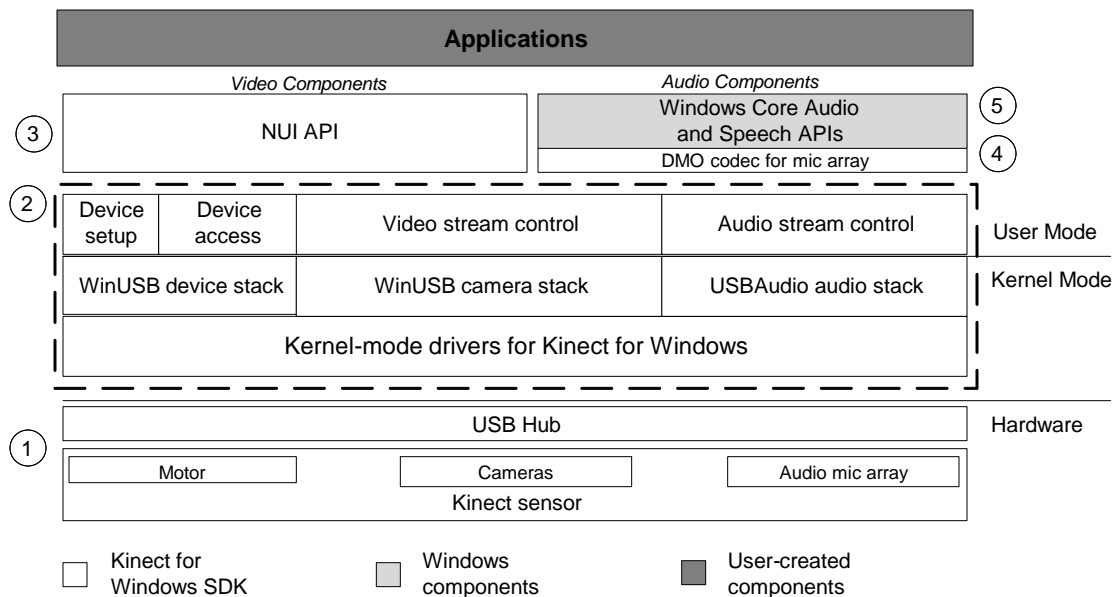

# What we'll cover

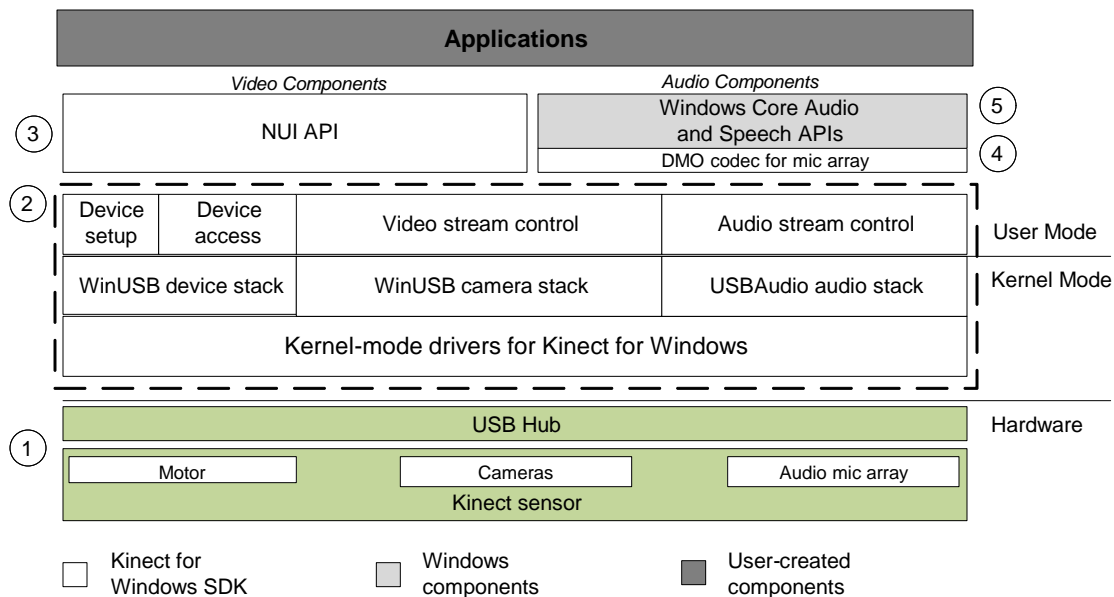

- Kinect Sensor
- Using Cameras
- Understanding Depth Data
- Skeletal Tracking
- Audio

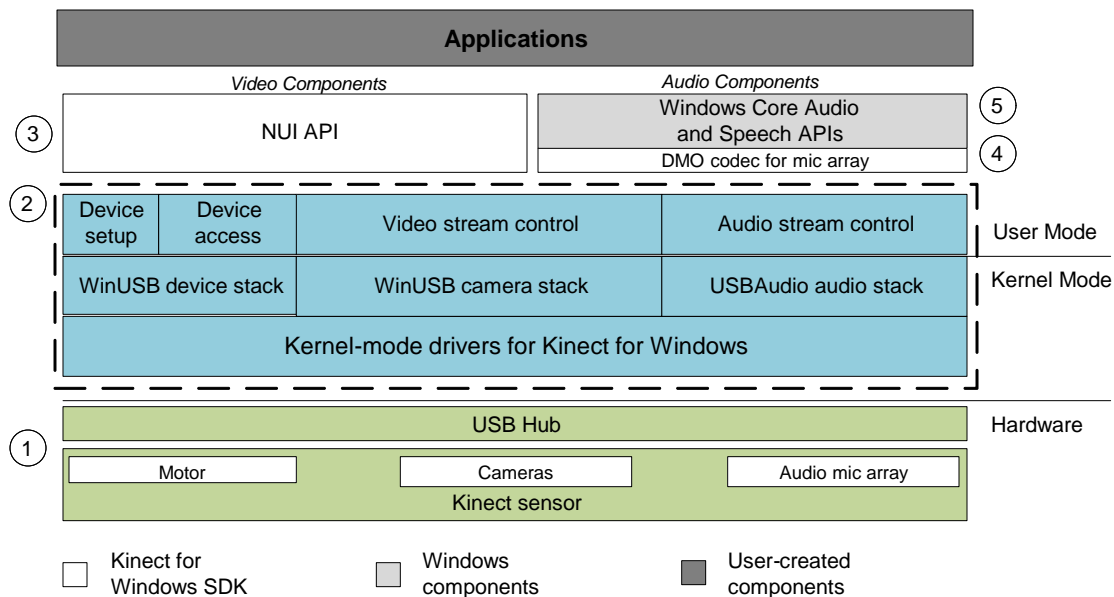

# SDK Architecture

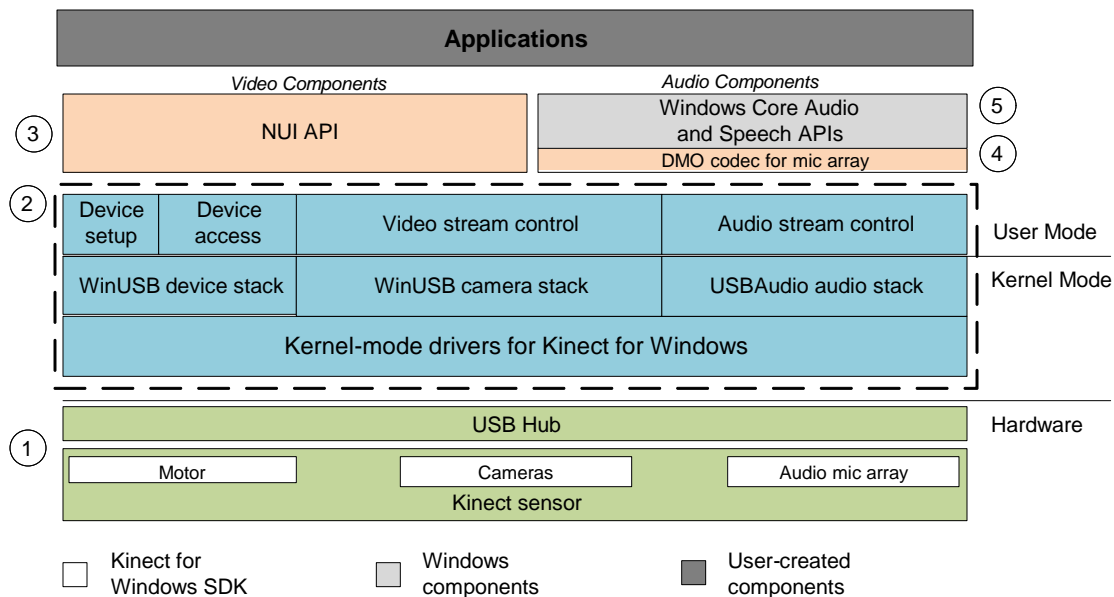

# SDK Architecture

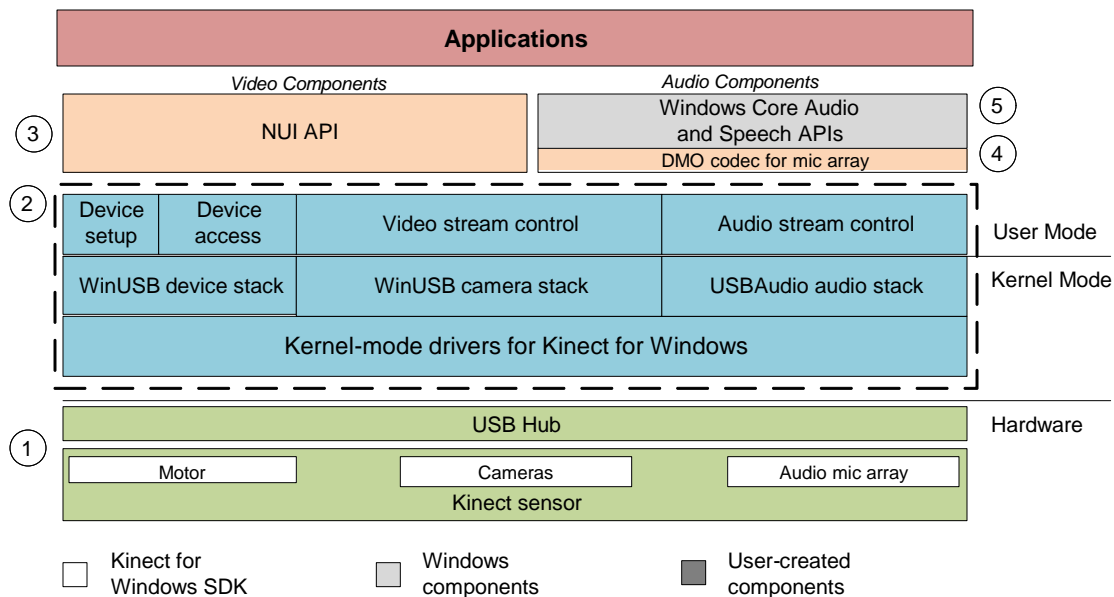

# SDK Architecture

# SDK Architecture

# SDK Architecture

# Using Cameras

## Demos

# Understanding Depth Data

- `ImageFrame.Image.Bits`
- Array of bytes - `public byte[] Bits;`
- Array
  - Starts at top left of image
  - Moves left to right, then top to bottom
  - Represents distance for pixel in millimeters

# Calculating Distance

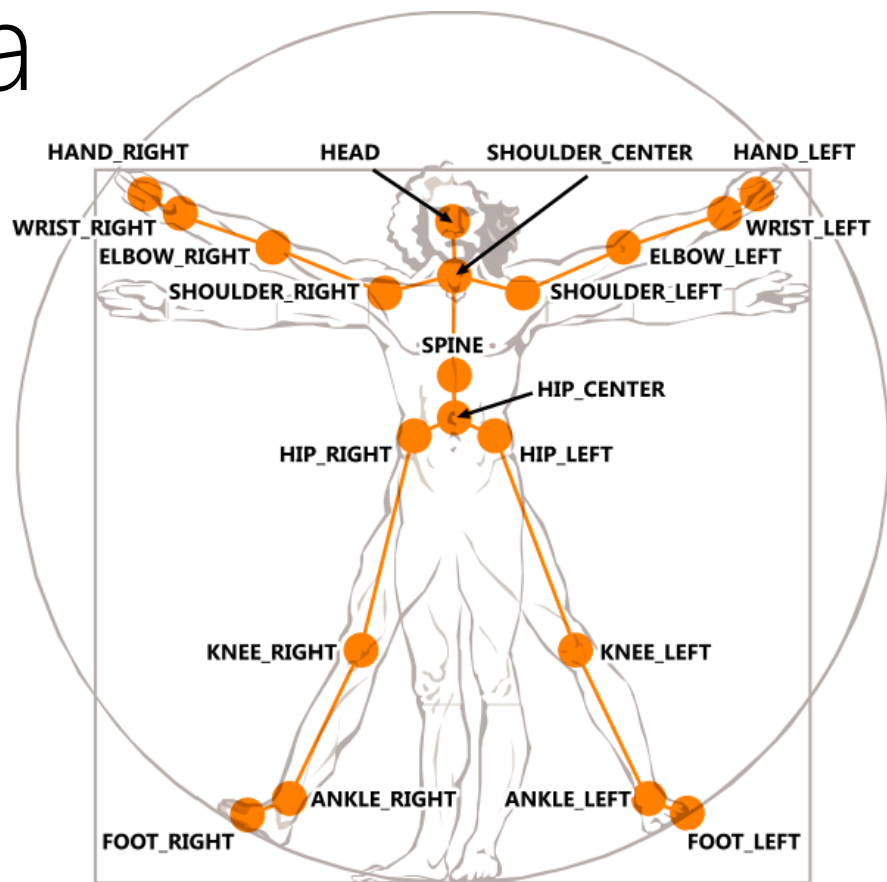

- 2 bytes per pixel (16 bits)
- Depth – Distance per pixel
  - Bitshift **second byte by 8**
  - Distance (0,0) = `(int)(Bits[0] | Bits[1] << 8);`
  - VB `(int)(CInt(Bits(0)) Or CInt(Bits(1)) << 8);`
- DepthAndPlayer Index – Includes Player index
  - Bitshift by **3 first byte** (player index), **5 second byte**
  - Distance (0,0) = `(int)(Bits[0] >> 3 | Bits[1] << 5);`
  - VB: `(int)(CInt(Bits(0)) >> 3 Or CInt(Bits(1)) << 5);`

# Depth Reference

- Distance Range: 850 mm to 4000 mm range
- Depth value 0 means unknown
  - Shadows, low reflectivity, and high reflectivity among the few reasons
- Player Index
  - 0 – No player
  - 1 – Skeleton 0
  - 2 – Skeleton 1
  - ...

# Demos

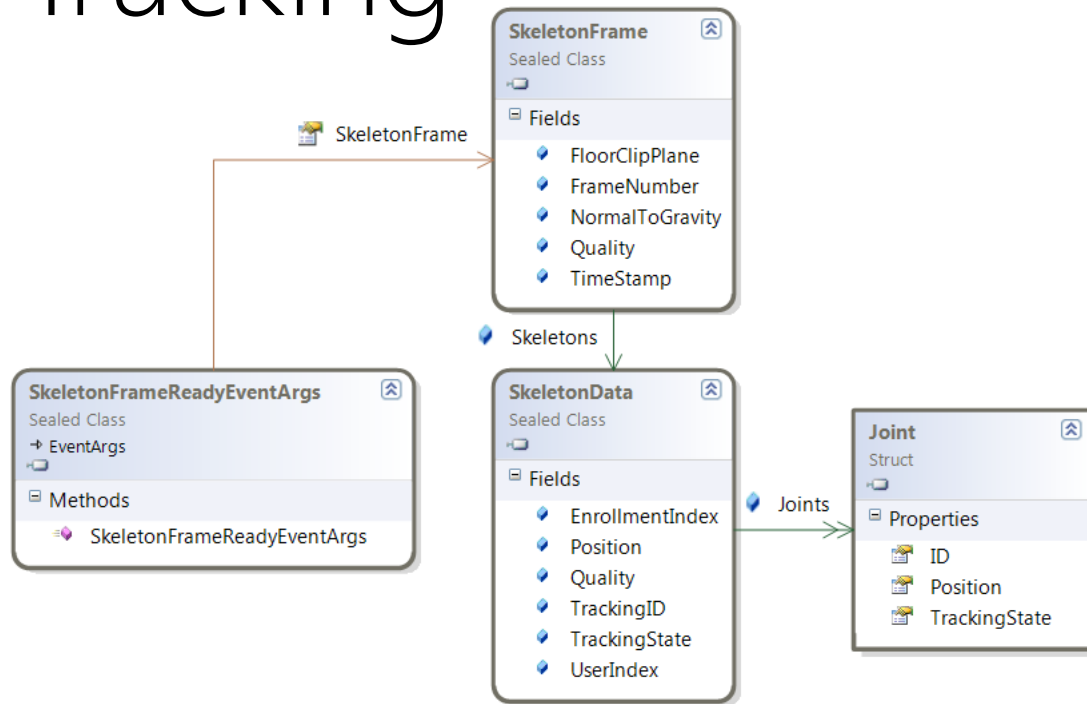

# Skeleton Data

# Joints

- Maximum two players tracked at once
  - Six player proposals
- Each player with set of  $\langle x, y, z \rangle$  joints in meters
- Each joint has associated state
  - Tracked, Not tracked, or Inferred
- Inferred - Occluded, clipped, or low confidence joints
- Not Tracked - Rare, but your code must check for this state

# Skeletal Tracking

# Demos

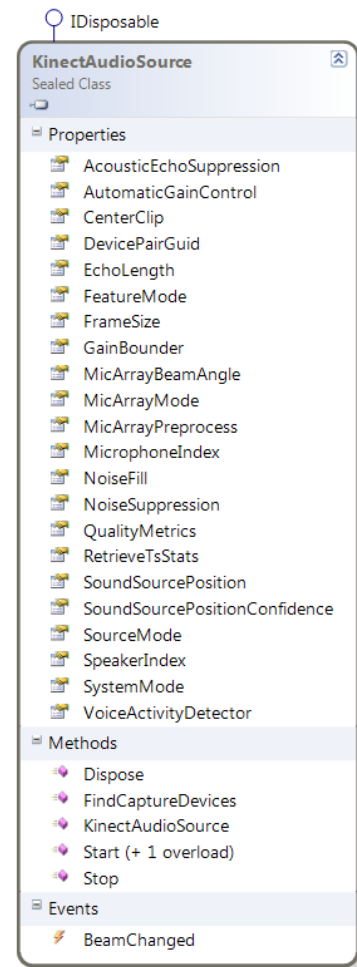

# Audio Going Inside of Kinect

- Four microphone array with hardware-based audio processing
  - Multichannel echo cancellation (AEC)
  - Sound position tracking
  - Other digital signal processing (noise suppression and reduction)

# Audio

- Kinect as a microphone
- Kinect for Speech Recognition

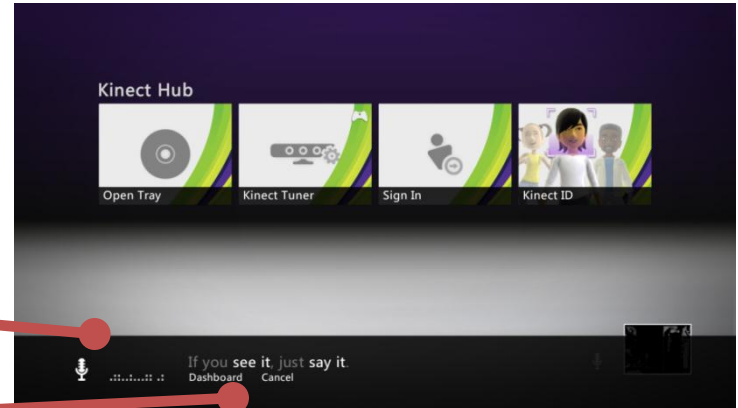

# Multi-modal Feedback

- Engagement model
  - Mic indicator for speech-enabled menus
  - Keyword to engage

- Feedback and confirmation (both passive and active)

# Speech Recognition

- Kinect Grammar available to download
- Grammar – What we are listening for
  - Code – GrammarBuilder, Choices
  - Speech Recognition Grammar Specification (SRGS)
    - C:\Program Files (x86)\Microsoft Speech Platform SDK\Samples\Sample Grammars\

# Grammar

```
