The Future of Software Engineering on Mobile Devices

Nikolai Tillmann Principal Research Software Design Engineer

5/24/2012

technology shift

Global Internet Device Sales

Microsoft Research Faculty Summit 2012 Riviera Maya, Mexico | May 23-25 | In partnership with CONACYT

technology shift

smartphones outsell PCs

smartphones might be first and possibly only computing device for many people

smartphones perform many common PC tasks

smartphone specs

	iPhone 4	minimum Windows Phone 7 specs
Processor	?	800 Mhz
Display	960x640	800x480
Memory	512 MB	256 MB
"Disk"	16-64 GB	8 GB

more than your PC:

hardware-accelerated graphics, touchscreen

```
WiFi, cellular (GSM 3G or CDMA), bluetooth
```

high-resolution camera(s)

GPS, accelerometer, gyroscope, compass, ambient light sensor, proximity sensor, FM tuner, ...

smartphone uses

text messaging taking photos internet browsing emailing downloading apps gaming social networking navigating watching video

what's not on the list?

writing code, creating apps!

. . .

walled garden

many platforms only allow user to run apps from vetted "app store" or "Marketplace"

have you already tried to create a mobile app?

script your phone with touch develop

**** COMMODORE 64 BASIC V2 **** 64K RAM SYSTEM 38911 BASIC BYTES FREE EADY. 0 PRINT "HELLO WORLD" 8 GOTO 10 bringing the joy of programming from early computers to modern mobile devices

a touch-based IDE in your pocket

Microsoft

the alternatives...

PC – legacy development model

Android: AIDE, App Inventor, ...

iOS: Codea

mobile development environments are becoming popular on all platforms

only **touch**develop embraces new devices (touchscreen, editor, language, social)

... and back to **touch**develop

resources for learning and teaching

how to become famous and get rich

beyond phones

book + slides

available free online touchdevelop.com/book touchdevelop.com/slides

introduction to programming on a phone how to use app + editor + language

for teachers + students

need phones?

University Phone Loan Program for **touch**develop

are you interested in using **touch**develop for teaching... basic programming concepts? mobile computing classes? compiler and languages classes? investigating the **touch**develop language? loan program: get Windows Phones for a semester. how to apply: <u>touchdevelop.com/teach</u>

sell apps ... get rich

submit your scripts as real apps to Windows Phone Marketplace!

requires App Hub developer account (free for students via <u>Dreamspark</u>) app needs to pass regular certification process on App Hub

beyond phones

user interfaces

clone analysis

privacy concerns

plug-ins

distributed state, distributed execution

touchdevelop is popular (released April 2011)

> 180K app downloads; in top 1% of all apps (out of 80,000) of Windows Phone Marketplace rated 4.5/5 by users

great for learning

it's fun! immediate feedback. show your friends what you do on your phone manipulate your own data (songs, pictures, etc.)

embraces new reality

language and editor optimized for touchscreen first-class access to all sensors and services sharing and learning with friends in the cloud

Interview of the second state of
